

Learning Adobe Capture

Beginning & Intermediate Level

As a digital creator, you never know when or where inspiration might strike. Chances are, it won't be while you're sitting at your desk. With Adobe Capture, you can use your mobile device to turn anything you see, wherever you are, into building blocks for your designs. In this course, graphic arts professional Theresa Jackson explains how to transform images captured on your phone or tablet into color themes, patterns, fonts, brushes, shapes, gradients and more. She also shows you how all the assets on your mobile device can be saved to your Creative Cloud library and used in apps like Photoshop, Illustrator, InDesign, and Premiere Pro. Join this course to learn all the ways Adobe Capture can help jumpstart your next creative project or inspire your next big idea.

Date & Time: Thursday, July 7th from 1:00 PM to 2:15 PM

Objectives:

- Capture vector shapes, colors and patterns
- Capture pixel, ribbon and vector brushes
- Match fonts
- Capture a “look”
- Capture 3D material
- Capture an audio clip

Instructor(s): Theresa Jackson
